

Exhaust Silencers

Exhaust Silencers safely and economically reduce exhausted air noise up to 45 decibels.

These silencers are made of a tough, high-density form of polyethylene. This porous material allows expanding air to escape at noise levels below OSHA standards, reducing air blast to a whisper. The threaded base is made of solid, high-density polyethylene.

Available in six sizes, Exhaust Silencers can be used on any equipment discharging air. They operate at pressures up to 150 psi, and they fit most exhaust ports. Maximum temperature: 175°F.

Part No.	NPT	L	D	Weight (grams)
54009	1/8"	1 3/8"	5/8"	3
54011	1/4"	1 7/8"	3/4"	5
54015	3/8"	2 3/4"	1"	10
54017	1/2"	2 7/8"	1"	12
54021	3/4"	5 1/2"	1 1/2"	40
54028	1"	5 1/2"	2"	55
