

On 14 November 2015, the European Commission published in the Official Journal of the European Union (OJEU) Regulation (EU) 2015/2030 which amends the conditions of the prohibition on short-chain chlorinated paraffins, SCCPs, under Regulation (EC) No 850/2004 on persistent organic pollutants (POPs).

In this new amendment, SCCPs are allowed to be present in articles if the concentration is less than 0.15% by weight. This entered into force on 4 December 2015.

We declare to the best of our knowledge, that all products and packaging material do not contain any SCCPs or other substances included in the POPS regulation.

We will continue to review the current and future additions to the POPS regulation and will immediately notify our customers if and when a substance above any threshold level is discovered in our supplied products.
